

## Corporate Profile:

# digitalHUB Aachen e.V.

The digitalHUB Aachen e.V. ([www.aachen.digital](http://www.aachen.digital)) is a registered association that promotes the digitization of the economy and public sector in the Aachen region. Members are medium-sized businesses, industry, startups and institutions that support the goals of the association. The digitization center of the digitalHUB Aachen brings together startups and IT medium-sized businesses (digital "enablers") with classic medium-sized businesses and industry as users (digital "users") in the digitalCHURCH to jointly develop and realize new digital business models. This is supported by the region and science ("supporter"). In this way, an "Aachen Area" will be created on a Euregional level as a digital innovation country. Since 2025, the digitalHUB Aachen has been one of a total of six 'NRW Hubs' funded by the Ministry of Economy, Industry, Climate Protection and Energy of the state of North Rhine-Westphalia. This initiative aims to accelerate the growth of startups in NRW.
